

Link to Assignment 4: <https://github.com/LordJatonyas/CWM-ProgNets/tree/main/assignment4>

By switching to the correct port on both the Python script and the simple_switch command...

```
pi@p4pi:~/CWM-ProgNets/assignment4 $ sudo simple_switch -i 0@eth0 calc.json
Calling target program-options parser
Adding interface eth0 as port 0
█
```

We get the correct results on the Lab Machine

```
ubuntu@ubuntu:~/Documents/CWM-ProgNets/assignment4$ sudo python3 calc.py
> 4 + 4
4 + 4
8
> 7 & 5
7 & 5
5
> 3 - 1
3 - 1
2
> 4 | 1
4 | 1
5
> 8 ^ 3
8 ^ 3
11
> █
```
